Policy Regarding Use of AI with the WSU General Scholarship Application

Purpose: To provide guidance on the acceptable use of generative AI tools when completing the WSU General Scholarship Application.

WSU Student Financial Services permits the use of Microsoft Copilot and other generative AI tools when completing the WSU General Scholarship Application. Because application essays have word limits, students are not required to cite the use of AI tools in preparing their responses.

Please keep in mind that any information that students provide to an AI system that is not a “Walled Garden” may become public.

Students remain responsible for the accuracy, authenticity, and completeness of their submitted materials.

This departmental policy aligns with WSU’s broader guidance on the appropriate use of artificial intelligence.

For questions regarding this policy, contact Student Financial Services.
